CERFACS  
France

Dr. Nils Hansen  
Sandia National Laboratories  
United States

Dear Author,

The Combustion Institute is pleased to inform you that your paper, PROCI-D-22-00830 "A Novel Reduced-Order Model Method for Characterization of Flame Response to Acoustic Modulation" was selected for oral presentation at the 39th International Symposium on Combustion.

For your paper to be included in the symposium program, it is imperative that you complete the Affirmation to Present **form** no later than **28 April 2022**. This **form** can only be filled out online, but pdf copies are available upon request.

**Please note, acceptance of your paper for oral presentation at the symposium is not an acceptance for publication in the Proceedings of The Combustion Institute, Volume 39.** Please wait for further communication from the PROCI Editorial team regarding publication decisions. Messages will be sent from the Elsevier Editorial Manager (EM) system in the near future concerning revisions.

The health and safety of The Combustion Institute community remains our top priority as we prepare for the symposium in Vancouver. We are planning for a 100% in-person meeting in July and encourage everyone to attend. Safety protocols will be in place to ensure the highest-level precautions are taken and the lowest-level of risk is encountered. If travel restrictions at the time of the symposium should prevent your in-person attendance, accommodations will be made to ensure your ability to participate.

Please go to the **Symposium website** to stay up to date regarding presentations and other advice. It will be updated as new information becomes available.

Congratulations on your achievement!

Program Co-Chairs,

Dr. HdR Bénédicte Cuenot  
CERFACS  
France

Dr. Nils Hansen  
Sandia National Laboratories  
United States
